Smart Technology, Made to Care

Detect

Combined Occupancy/Enuresis Sensor

The Cair Detect is an alternative occupancy sensor.

Simple and easy to use, the Detect can be configured as an occupancy and enuresis sensor in one unit. An in-built sounder can provide audio confirmation along with LED indication which provides additional reassurance to users. Two RJ12 terminal inputs are provided for multiple device connections.

Detect

Occupancy/Enuresis Sensor

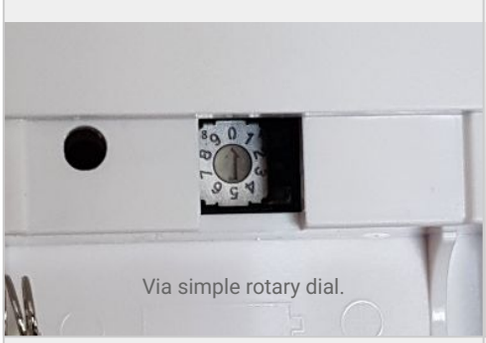
Features list

- Multiple configurable options
- Simple and easy to use
- Sound and LED Indication
- Interoperable

Specifications

Compatibility	Various Industry Protocols
Operating Frequency	869 MHz / Custom
Dimensions	L115 x W69 x D28 mm
Inputs	2 x RJ12 inputs
Replaceable Battery	2 x AA batteries
Battery Life	3 years with 5 alarm transmissions per day
Auto Low Battery	Battery tested daily (protocol dependent)
Wireless Range	Up to 600m line of sight
Compliance	CE / UKCA / RoHS 2 / RED
Warranty	24 months

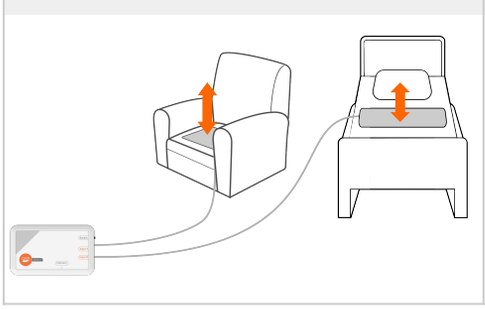
Easy programming



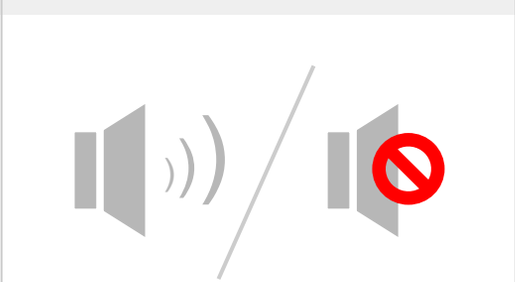
External on/off switch

Cancel at source

Virtual sensor option



Sound option



Enuresis sensor

Hereby, Cair (UK) declares that the radio equipment type, Detect is in compliance with Directive 2014/53/EU
