

RX2 Mk2 Receiver

Professional Wireless Solutions

POCSAG Radio Logging Receiver

Features

- Two output zones with relays
- RS232 serial output
- Small footprint
- microSD card
- Programmable via USB
- High specification Cat 1.5 receiver module
- Logging and graphing functions
- Received Signal strength indicator (RSSI)

The Scope RX2 Mk2 is a compact, versatile UHF POCSAG receiver decoder. It is equipped with 2 individually switchable output relays, an RS232 serial port, microSD card, logging and graphing functionality.

See next page for further details

RX2 Mk2 Receiver

SPECIFICATIONS

Power:

12v - 13.8v dc input

Current:

38mA standby

92mA active serial decoder

126mA active, all relays +
sounder

Signal Format:

POCSAG FSK NRZ (normal/
inverted)

Frequency:

430 - 470MHz

Channel Spacing:

12.5KHz or 25 KHz

Frequency Deviation:

+/-2.5KHz or +/-4.5KHz

RF Band Rate:

512/1200/2400

Receiver Performance:

Blocking: Cat 1.5, EN 300 220-1 V3.1.1

Sensitivity: -117dbm for 1% error

Compliance:

Radio Equipment Directive

2014/53/EU

ROHS Directive (EU) 2015/863

Standards Applied:

EN 300 220-1 V3.1.1 (Radio)

EN 301 489-1 V2.2.1 (EMC)

EN 62368-1: 2020 (Safety)

Relay Contact Max Rating:

1A @ 60V DC

Serial Port:

RS232

1200-115200 baud

N 8 1

Supplied PC software

The supplied PC app software not only enables you to configure the RX2 to your requirements, but also contains functions to download the received event log and to view real-time events in text and graph format.
